## SUMMARY

Aspiring AI Engineer and Software Developer with hands-on experience building production-ready AI agents, LLM-powered applications, and intelligent web solutions. Proficient in Python, JavaScript, Node.js, Flask, and modern Generative AI technologies, with practical experience in prompt engineering, NLP, and real-time AI systems. Passionate about designing scalable AI-driven applications that combine strong software engineering principles with practical machine learning solutions.

## SKILLS

Programming Languages: Python, JavaScript (ES6+), Java, SQL.

Frameworks & Backend: Flask, Node.js, Express.js, Spring Boot.

Frontend: HTML5, CSS3, Tailwind CSS, React.js.

AI & Machine Learning: Large Language Models (LLMs), Prompt Engineering, Generative AI, Natural Language Processing (NLP), Scikit-learn, Pandas, NumPy.

Databases: MongoDB, SQL.

Developer Tools: Git, GitHub, Power BI, Microsoft Excel.

Core Concepts: REST APIs, Object-Oriented Programming (OOP), AI Agent Development.

Languages: English, Tamil

## EDUCATION

**Rajalakshmi Institute of Technology, Chennai** *2022 - 2026*
B.Tech, Artificial Intelligence and Data Science | CGPA: 7.9

**AV Meiyappan Matriculation Higher Secondary School, Chennai** *2020 - 2022*
Senior Secondary (XII), Tamil Nadu State Board | Percentage: 89.33%

**St John's Matriculation Higher Secondary School, Chennai** *2019 - 2020*
Secondary (X), Tamil Nadu State Board | Percentage: 89.00%

## WORK EXPERIENCE

**Voxy — Prompt Engineering Intern** *2026 - Present*
Built and deployed 5+ production-ready AI agents powered by Large Language Models (LLMs) for healthcare automation. Engineered and optimized system prompts to improve contextual grounding, response accuracy, multilingual interactions, and low-latency inference across real-world healthcare workflows. Contributed to prompt evaluation, Git-based version control, testing, and deployment of AI systems into production environments.

**Deffo Tech** *2026*
Curated and processed domain-specific Tamil language datasets for Large Language Model (LLM) development. Performed NLP preprocessing, tokenization, and dataset preparation to improve regional language understanding. Collaborated with the engineering team to support scalable AI workflows and regional language model development.

**NullClass** *2025*
Completed an intensive internship focused on Data Analytics and Data Preparation using Microsoft Excel and Power BI. Gained hands-on experience cleaning, transforming, and preparing complex real-world datasets for business analysis. Built interactive Power BI dashboards to deliver actionable insights and support data-driven decision-making. Strengthened front-end development skills by designing responsive interfaces with HTML and CSS.

## PROJECTS

**Skill Gap Analyzer**
Developed an AI-powered resume analysis platform using Flask, Python, NLP, and LLMs to identify skill gaps and generate personalized technical assessments from uploaded resumes.

**Smart AI-based Pet Registration System**
Built a smart AI-based pet registration system using Python, Mobile2Vec, Flask, and Vision-Language Models to enable automated dog breed prediction, Aadhaar verification, and real-time digital licensing with breed-based vaccine recommendations.

**Spotify Data Analyzer**
Built a Flask-based data analytics web application using Python, SQL, and Matplotlib to fetch, process, and visualize Spotify music data, delivering insights into track performance, engagement metrics, and listening trends.
